Our Company

Control Systems International Company Limited (CSI) is incorporated under the Laws of the Federal Republic of Nigeria, with its head office at Ilupeju Lagos, Nigeria.

CSI is an engineering company with extensive experience in engineering, procurement, construction, calibration, and consultancy services in the oil & gas industry and fueling solutions for aviation, mining, construction and manufacturing.

Excellence is our hallmark at CSI. With a focus on innovation and reliability, we deliver top-tier solutions tailored to meet industry demands. Our commitment to quality, safety, and client satisfaction sets us apart, ensuring optimal performance at every stage.

Vision

A multi-national industry leader advocating for safety, precision and quality in engineering for our clients and customers.

Mission

Make the difference in delivering quality services and products, taking pride in the strength and wealth of our team, and keeping innovation at the core of all our processes.

Our Story

Registered in Nigeria (RC367866) October 1999, CSI commenced operation as an engineering company in September 2000.

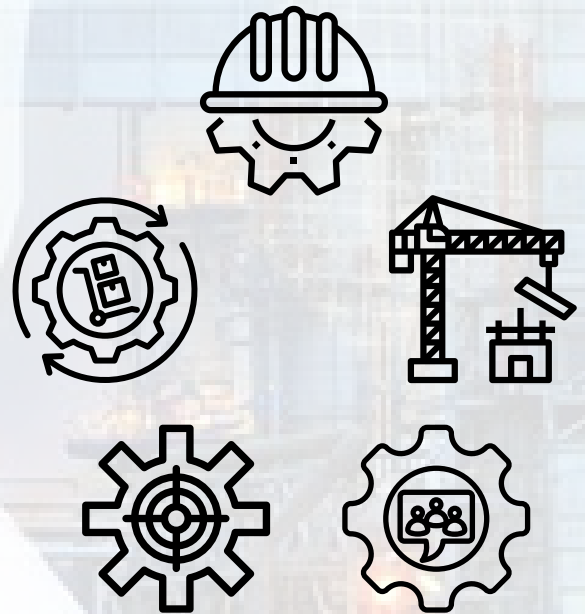

CSI started out with engineering, construction and calibration services in the downstream oil & gas industry in Nigeria. We have since grown in size and expertise; with clients across different industries in Africa and partners across the world.
